Delete the about tab 1 2 3 etc. underneath the page

Login page:
- Input mirror link list
- Add pgp verify market links

Registration:
- Passwords must be at least 8 characters long, have 1 number and 1 capital letter. (password cannot be same as username or too easy (block passwords like these: 12345678, password, 87654321, password1, password12)
- Username must be at least 6 characters long and max 16 characters long)
- Select PIN, confirm PIN (must be 6 digits long)
- Set default currency: EUR, POUND, DOLLAR, AUS dollar, Canadian dollar. New registered user MUST choose one currency as their standard display currency.
- Personal phrase needs to be filled in (will be displayed on homepage)
- After registration mnemonic seed is to reset password if forgotten. Will be shown once and has to be confirmed by retyping inside field!
  (seed is 8 words long)

Buying process:
- To buy a listing a simple ''Buy'' button on the listings below the dropdown product selection menu. User can hit the buy option after an option has been selected.
- Remove ''Select country'' option
- Remove ''Send message'' option
- Add dropdown product selection menu:

Product	Select product
	1 mobile phone - 100 euro
	2 mobile phones - 200 euro

Dropdown menu

- Once the user has selected the product option and has clicked ''buy'' it will be taken to the checkout page.
- There the user can select shipping option with dropdown menu:

Product picture	Same details as on listing page: Vendor: ALi Level 2 Ship From: all Ship TO: Pakistan Payment Option: escrow Crypto Currency: Btc, Xmr, Auto Accept: Yes Current Stock: 70
1 Selected product	Input Shipping address/details (this will auto encrypt with vendor pgp)
2 Select shipping option	
3 Select crypto to pay with	
4 captcha	
BUY button	

Category:
- Should be Main categories, when clicked on it a dropdown of subcategories appear
- Add sorting system with the following:
Old to new
New to old
Random
Most popular
Price low to high
Price high to low

- Add filter system for product listings with the following filters:
Shipping from
Shipping to
Accepted Crypto

Rates:
- Delete Fiat rates
- On crypto rates add only the pairs with the standard fiat rate that the user has selected:
i.e. user has selected ''USD'' as standard it will be:
USD – BTC
USD – XMR

Or EUR:
EUR – BTC
EUR - XMR

Vendor add product process:

- For vendor there should be a vendor-cp
- Enlarge description field
- Set 3 Shipping options with optional ''+'' button to add 2 more.
- Shipping from: vendor can select only 1 country.
- Shipping to: vendor can either select:
  Worldwide (all countries are selected)
  Select per country (i.e. US, Australia, Mexico etc.)
- Instead of a slide menu for the crypto just make the vendor select the crypto with check boxes. Example:

Accepted cryptocurrencies
☒ Bitcoin (BTC)
☐ Monero (XMR)

- Delete desired currency as the rate will be adjusted by the standard currency set by the user.
- Multiple prices: vendor can start with 3 prices with optional ''+'' button to add 7 more. This will be the dropdown menu and should look like this

Product name	quantity	measure unit	Price

Mobile phones - 10 pieces - 200 Euro   will look like this for the user

Product name: Can only contain number and characters
Quantity: can only contain numbers with:
- Minimum number: 1 , can't be 0
- Maximum: 6 digits
- Integer: can only have 2 digits after comma: So 1.75 or 1.25 **NOT** 1.755

Measure unit: can only contain letters
Price: can only contain numbers and must be integer (i.e. can't have 19.99)

- There should be an option to add unlimited stock or set limited amount of stock. (meaning is vendor has 100 products and a buyer buys 5 products there will be 95 products displayed left. If the buyer cancels or time to fulfill order runs out the 5 are added back to stock. If all stock has sold the listing will be put on hold with message display "Sold out".
- There should be an option to auto-accept the order. (Meaning if an order has been placed the vendor will have to send the order as its marked as accepted.)

- There should be an option to select the amount of escrow days as said in the previous market document. Escrow starts at time of vendor hitting the ''send button''

Escrow time:
Vendor can select on their product listing the set amount of escrow time
The options are:
- 5 days
- 7 days
- 10 days
- 14 days
- 21 days

- Buyer can extend twice 48 hours before escrow finalizes with 7 days.

Dispute process:

Vendor can come up with instant resolution: Offer buyer x amount of money in escrow as a refund. (vendor can set own amount or hit quick button, 10%, 25%, 50%, 75%, 100%)

If buyer accepts, dispute is automatically closed with the amount refunded to buyer and vendor gets to win the dispute.

Buyer/vendor can always finalize dispute. If finalized the other party wins the dispute.

If no resolution can be agreed to , both parties have to wait for mod intervention. Mod can also refund and spread the escrow money among both parties.

If either buyer/vendor does not reply within 3 days the dispute will be won by the last replying party. If both parties agree to waiting some more time the dispute can be extended by the vendor initiating a ''wait another 7 days request.'' Buyer has 3 days to click accept otherwise the dispute will be finalized. This can be done twice.

Admin panel:

There should be different kind of rights to admin panels:

Mod panel level 1:
Can reply to tickets from buyers and vendors
Intervenes within disputes

Mod panel level 2:
Can reply to tickets from buyers and vendors
Intervenes within disputes
Can pause or delete listings from vendors
Can Ban vendor and buyer accounts

Admin panel:
Can reply to tickets from buyers and vendors
Intervenes within disputes
Can pause or delete listings from buyers
Can ban vendor and buyer accounts
Has insights into finance, escrow wallets, orders etc.
